Allowable Subject Matter

Claims 1-6, 8, and 9 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest the claimed process. The closest prior art is Stern et al. (US Pat. 5,763,539). Stern et al. teaches polymerizing a mixture of monomers having bulky substituents on the terminal carbons and monomers having two hydrogen atoms on the terminal carbons (5:15-6:62). Taylor et al. (Synthetic Metals 102 (1999) 1120-1121) teaches that bulky substituents will lead to a lower molecular weight for the polymer (pg. 1121). However, none of the references recognize the ratio of monomers having substituents to monomers without substituents as being a result effective variable. A particular parameter must first be recognized as a result-effective variable, i.e., a variable which achieves a recognized result, before the determination of the optimum or workable ranges of said variable might be characterized as routine experimentation. *In re Antonie*, 559 F.2d 618, 195 USPQ 6 (CCPA 1977). See MPEP § 2144.05.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
